Parent/guardian completes this form when medications are ordered on a form that is not the "Medication Authorization for CMS Students (version 04/25/17 rnl)". Parent/Guardian: Please read the information below. Fill in the contact information for your child's healthcare provider and parent/guardian contact information. Sign and date the form.

Important Information about Medication Admininstration in CMS Schools

- When possible, medications should be taken before or after school. Administration of non-prescription medications at school is discouraged.
- Written parent/guardian consent and an order from a healthcare provider licensed in North Carolina are required for administering prescription and over-the-counter medications at school (CMS Policy JLCD/Regulation JLCD-R). Contact the school nurse for help if relocating from another state with orders from an out-of-state provider. Some medications may not be suitable for a school setting. Additional documentation may be required for some medications (examples: research medications, medications with potential for immediate serious side effects). Contact the school nurse if you have questions.
- No medication will be given at school until the Medication Authorization form completed by the healthcare provider has been approved by a school nurse.
- Medications are given by a nurse or trained CMS staff.
- Unless changed in writing, medication orders will be used for the entire school year within which it was written.
- New authorization forms are required at the beginning of every school year, when the dose or directions change, and when a new medication is prescribed. Parents/guardians must supply the medications.
- Each medication must be in the original labeled container from the pharmacy or healthcare provider's office. Some pharmacies will provide an extra container for school use.
- Information about this medication and the student's health may be shared with other school staff or agents of the school to help assure the student's safety and success at school.
- The school nurse may contact the healthcare provider who prescribed the medication and the pharmacy where the prescription was filled to discuss this medication and the student's health.

I have read and understand the "Important Information about Medication Administration in CMS Schools". I give permission for my child to receive the medications ordered by the healthcare provider during school hours. I give permission for the healthcare provider, pharmacist and their staff to provide information to the school nurse about my child's medication(s) and health. On behalf of my child, I release the Charlotte-Mecklenburg Board of Education, their agents and employees from any and all liability whatsoever that may result from my child taking the medication(s) at school.

Write on line below.

Parent's/Guardian's Name (print) Signature Date
